“ Many, many years ago A broken young man was saved by the steps of a man that had walked the path before him. He shared his wisdom and taught that young man that its ok to believe in a power greater than himself that could deliver him from the insanity that had taken over his life. Later as life went on the young man stumbled and slipped many times often after the slip he'd catch a meeting, and be reminded " Keep comin' Back". I dont really know if he knew, after many years of bumpin' my head. I think, I finally got it. Wandell gave me those tools, and helped me to keep comin' back. You'll be greatly missed Sir.
